
Subject: [PATCH 1/2] dm-ioband: I/O bandwidth controller v1.0.0: Source code and patch

Posted by [Ryo Tsuruta](#) on Mon, 19 May 2008 08:23:34 GMT

[View Forum Message](#) <> [Reply to Message](#)

Here is the patch of dm-ioband.

Based on 2.6.26-rc2-mm1

Signed-off-by: Ryo Tsuruta <ryov@valinux.co.jp>

Signed-off-by: Hirokazu Takahashi <taka@valinux.co.jp>

+ * <Method>    <description>
+ * g_can_submit : To determine whether a given group has the right to

```

```

+ *      submit BIOs. The larger the return value the higher the
+ *      priority to submit. Zero means it has no right.
+ * g_prepare_bio : Called right before submitting each BIO.
+ * g_restart_bios : Called if this ioband device has some BIOs blocked but none
+ *                  of them can be submitted now. This method has to
+ *                  reinitialize the data to restart to submit BIOs and return
+ *                  0 or 1.
+ *                  The return value 0 means that it has become able to submit
+ *                  them now so that this ioband device will continue its work.
+ *                  The return value 1 means that it is still unable to submit
+ *                  them so that this device will stop its work. And this
+ *                  policy module has to reactivate the device when it gets
+ *                  to be able to submit BIOs.
+ * g_hold_bio    : To hold a given BIO until it is submitted.
+ *                  The default function is used when this method is undefined.
+ * g_pop_bio     : To select and get the best BIO to submit.
+ * g_group_ctr   : To initialize the policy own members of struct ioband_group.
+ * g_group_dtr   : Called when struct ioband_group is removed.
+ * g_set_param   : To update the policy own data.
+ *                  The parameters can be passed through "dmsetup message"
+ *                  command.
+ * g_should_block : Called every time this ioband device receive a BIO.
+ *                  Return 1 if a given group can't receive any more BIOs,
+ *                  otherwise return 0.
+ * g_show        : Show the configuration.
+ */
