Habe gerade die Lösung gefunden ->

[http://bugzilla.openvz.org/show\\_bug.cgi?id=771](http://bugzilla.openvz.org/show_bug.cgi?id=771)

post-up ip route add 10.0.1.0/24 dev eth0

pre-down ip route del 10.0.1.0/24 dev eth0

inside the block of "inet eth0 static" in /etc/network/interfaces
