Subject: COMPAQ/HP ARRAY SUPPORT
Posted by henrydenhengst on Wed, 09 Nov 2005 09:09:35 GMT

The compaq/hp array (scsi disk) is not supported in the openvz kernels, in short cparray, like it is in any edition of RH, Fedora or CentOS.

Can anyone tell me how it should be compiled into the kernel, than I will make the kernels of course available for anyone.

THANX
