Subject: openvz tcp&networking tunning
Posted by Zhaohui Wang on Wed, 28 May 2008 21:48:35 GMT

Hi all

Can anyone tell me that how to use tcpsndbuf,tcprcvbuf,dgrmbuf to tune the container's networking?

What's the unit of such parameters,Bytes or Kbyte,if I changed them to bigger or smaller ones,what will happen?

Best Regards
Zhaohui Wang
