
Subject: Is it possible to share non-private areas when you are not migrating from virtuoizzo?

I'm migrating 12 CentOS based VPS's from Virtuoizzo to OpenVZ.

From everything I've read, with a direct migration, I pretty much have to multiply the space I'm using in Virtuoizzo by 12.

My questions is.... If I do a complete reinstall of all 12 VPS's, can I get the non-private-area (OS Template) disk savings back?

Thanks for your help.
