Subject: vmigration_call: what's that?

Posted by Xandrian on Thu, 11 May 2006 09:50:06 GMT

hi,

now my machine is running with test012.1. but in my log i found this lines:

vmigration_call 101:0, act 3
vmigration_call 101:0, act 2
vmigration_call 101:1, act 3
vmigration_call 101:1, act 2
VPS: 101: started
vmigration_call 102:0, act 3
vmigration_call 102:0, act 2
vmigration_call 102:1, act 3
vmigration_call 102:1, act 2
VPS: 102: started
vmigration_call 103:0, act 3
vmigration_call 103:0, act 2
vmigration_call 103:1, act 3
vmigration_call 103:1, act 2
VPS: 103: started

first i think that's a conversion from the old one to the new one but after a second i reboot i can also find this lines...

btw: machine is workin well .... until now

cu tb
