```

Some problems with the patchset:

```
patching file arch/ia64/kernel/sys_ia64.c
Reversed (or previously applied) patch detected! Assume -R? [n] n
Apply anyway? [n] n
Skipping patch.
1 out of 1 hunk ignored -- saving rejects to file
arch/ia64/kernel/sys_ia64.c.rej
patching file mm/mmap.c
Reversed (or previously applied) patch detected! Assume -R? [n] n
Apply anyway? [n] n
Skipping patch.
1 out of 1 hunk ignored -- saving rejects to file mm/mmap.c.rej
make: ***
[~/home/rtg/hardy/kern/ubuntu-hardy/debian/stamps/stamp-custom-prepare-openvz]
Error 1
```

You can test the prepare phase of the build without having to do all of the other flavours by using:

```
fakeroot debian/rules custom-prepare-openvz
```
