Hi,

have you read [http://wiki.openvz.org/UBC\\_failcnt\\_reset](http://wiki.openvz.org/UBC_failcnt_reset) ?

Why do you use 2.6.22 based kernels?

From <http://wiki.openvz.org/Download/kernel>

Quote:

These branches are not developed/supported anymore. They are here mostly for the historical reasons. Do not use it.
