Subject: Re: Problem with Networking - VENET Interfaces not Configured
Posted by sjdean on Sat, 07 Jun 2008 12:44:18 GMT

Something about why the guest failed to boot... Something that would give me an idea of where to look at.

For example, quite literally, within two seconds of trying to start my Virtual guest:

[root@rutsey /]# vzctl status 101
VEID 101 exist mounted running
[root@rutsey /]# vzctl status 101
VEID 101 exist mounted down
[root@rutsey /]#
