Hi,

please go there, then press "diff" - here is the patch.
then press "raw" save the patch.
then apply it to /usr/share/vzpkg/functions
(patch -p1 /usr/share/vzpkg/functions < PATCH_NAME)

P.S. If it's some problem with applying pay attention to the order of arches in this string

ARCHES="i386 x86_64 ia64 x86"

Everything should work.
