Subject: Accessing PCI Devices from VE Posted by sjdean on Sun, 08 Jun 2008 15:21:50 GMT View Forum Message <> Reply to Message

Could you tell me whether OpenVZ supports accessing physical devices on the Host from the VE?

The plan is, amongst other things, to setup an Asterisk container and if I need to perform any system upgrades, I envisage just swapping migrating the container to another host.

It's a home network only so...

But Ispci seems not to work. Should it?

pcilib: Cannot open /proc/bus/pci Ispci: Cannot find any working access method.

What can I do to get this working then?

Thanks Simon
