My HN is actually within the same network with an ip address of 192.168.10.2

Here are a few details from the HN.

thorpe@oblivion ~ # sudo ifconfig

```

And, from within the VE in question.

```

root@etch-lab:/# ip rule list
-bash: ip: command not found

```

Obviously, without an internet connection I can't install ip on the VE.

I have no netfilter (iptables) rules in place on either the HN or the VE.

```

thorpe@oblivion ~ # sudo iptables -L
Chain INPUT (policy ACCEPT)
target    prot opt source                destination

```

```

Chain FORWARD (policy ACCEPT)
target    prot opt source                destination

```

```

Chain OUTPUT (policy ACCEPT)
target    prot opt source                destination

```

```

root@etch-lab:/# iptables -L
Chain INPUT (policy ACCEPT)
target    prot opt source                destination

```

Chain FORWARD (policy ACCEPT)
target prot opt source destination

Chain OUTPUT (policy ACCEPT)
target prot opt source destination

As you can probably see I have other VE's running on this same machine, all of which have this same issue. No internet connection.
