My Kernel version is 2.6.18-53.1.13.el5.028stab053.10ent
My Tool version is 3.0.22

I created a Virtual Machine(db2).
I install mysql on db2.
I want to create a HA by DRBD for MySQL High Availability.

But I can't create new device on db2.
Can you tell me how to create new device for DRBD Device?

Thanks for your support.

BR
Nick
