hi. i have a server which i have installed hypervm. i am a noob so was jst checking a few things nad now i cant access anything on the OpenVx server.

http shows error:
service httpd start
Starting httpd: Syntax error on line 2 of /etc/httpd/conf/lxadmin/default.conf:
<VirtualHost> directive requires additional arguments

mysql

[FAILED]
Timeout error occurred trying to start MySQL Daemon.
Starting MySQL:

i am a noob so i really dont know much but the site data is important to me. i had also installed LXadmin control Panel.

i think this error occerued after a reboot.(not sure)

can you please help me as it is a bit urgent.i am ready to send the root login detials.(ssh cannot be accessed so we have to use main node and then login ot the specifc VPS)
