Subject: Iptables in HN or VE?
Posted by ittec on Tue, 17 Jun 2008 08:29:43 GMT

Hi all

recently i noticed possible SYN attack on port 80 in some VE.

...
possible SYN flooding on port 80. Sending cookies.
possible SYN flooding on port 80. Sending cookies.
...

I use mod_dosevasive. Is possible to combine dosevasive with iptables to drop souspicous ips. But i don't have installed iptables yet. My question is, where I have to install iptables? in VE or HN? Iptables works well when interface(ethn) is a virtual interface(venet)?

Thanks
