Won't errno only be set if rc == -1? Did you mean || here?

Yes I meant ||. I also had 'errno = 0' before the read, but seem to have deleted it when I moved code around.

<snip>

```

      pipefds[1], fdinfo->fdnum); getchar();
Can you explain what you're doing here? I would have expected you to
```

dup2() to get back the correct fd, so maybe I'm missing something...

You are right, I should use dup2() here.

Will send an updated patch.

Thanks,
