that's it SOFTWARE_SUSPEND was missing because i deactivated the energy save options
now i can compile but i cannot load the module vzcpt...

```
# modprobe vzcpt FATAL: Error inserting vzcpt  
(/lib/modules/2.6.16-026test012/kernel/kernel/cpt/vzcpt.ko): Unknown symbol in module, or  
unknown parameter (see dmesg)  
#dmesg  
[...]  
vzcpt: Unknown symbol pmd_huge
```

any ideas? thx.
