```

| Thanks, Suka. This version works for both pipe and sleep testcases.

| Though, interestingly, it segfaults on the -lxc kernel. It succeeds on
| a recent -git from Linus' tree, though.

I have been testing 2.6.25-mm1.

I run into the semun_undo underflow bug with -lxc. Is that the same
bug you are running into ?

| So I'm about to apply these on <git://git.sr71.net/~hallyn/cryodev.git>

Thanks,

Suka
