| Thanks, Suka. This version works for both pipe and sleep testcases.

| Though, interestingly, it segfaults on the -lxc kernel. It succeeds on  
| a recent -git from Linus' tree, though.

I have been testing 2.6.25-mm1.

I run into the semun\_undo underflow bug with -lxc. Is that the same  
bug you are running into ?

|  
| So I'm about to apply these on [git://git.sr71.net/~hallyn/cryodev.git](http://git.sr71.net/~hallyn/cryodev.git)  
|

Thanks,

Suka
