Subject: RE: [RFC][v2][patch 0/12][CFQ-cgroup]Yet another I/O bandwidth controlling subsystem for CGroups bas Posted by Satoshi UCHIDA on Thu, 26 Jun 2008 04:49:20 GMT View Forum Message <> Reply to Message

Hi, Tsuruta.

- > In addition, I got the following message during test #2. Program

- > Do you see any problems?

No.

I tried to test in environment which runs from 1 to 200 processes per group.

However, such message was not output.

> The result of test #1 is close to your estimation, but the result

> of test #2 is not, the gap between the estimation and the result > increased.

> increased.

In the above my test, the gap between the estimation and the result is increasing as a process increases.

And, in native CFQ with ionice command, this situation is a similar. These circumstances are shown in the case of more than processes of total 200.

I'll investigate this problem continuously.

Thanks, Satoshi Uchida.
