Hello.

They recommend to install OpenVZ on a clean fresh install of linux.

Why do it other way?

 Subject: [Users] Do i need to stop Plesk / etc for openVZ to install

 Dear Friends,
 I have Plesk installed on RHEL , i want to install OpenVZ will it make a difference in the
installation or post installation.
 Or i need to shut that down before/after installation.
 Also what is hardware nod, is it the main server which contains all the VPS. Can i run all the
services likee ftpd,sshd ,httpd etc on the hardware node.
 Pl. reply,
 Thanks,
 Abhishek jain
