edit with you favorit editor /etc/init.d/reboot.sh
vi /etc/init.d/reboot.sh

and add ">//reboot" string
that's all

```
# Copyright 1999-2007 Gentoo Foundation
# Distributed under the terms of the GNU General Public License v2
>//reboot
opts="-dpk"
[ "${RC_DOWN_INTERFACE}" = "yes" ] && opts="${opts}i"

/sbin/reboot "${opts}" 2>/dev/null

# hmm, if the above failed, that's kind of odd ...
# so let's force a reboot
/sbin/reboot -f
```
