Subject: can access vps from server not from network
Posted by abhishek jain on Tue, 16 May 2006 02:38:14 GMT

Hi,
I add vps via the process listed at quick install guide, i can access the
vps via the server on which it is hosted , but when accessing from outside
using the assigned IP i access the server and not the VPS.
I can see the ip assigned to VPS in /sbin/ifconfig of the server.

Pl. tell me how to correct that.
Thanks,
Abhishek jain
