Maratrus, thank you very much...

Now I can reboot my desired kernel.. If I let the time count down I getting the error message, that I mentioned before..

But after pressing the ESC button I can choose the kernel. Can you say me which of the kernels should I take to make simulations in OpenVz.

I Can choose between this kernels here:

- 2.6.18-12-fza-686-bigmem
- 2.6.18-12-fza-686
- 2.6.18-12-fza-486

Thank you very much again...
