Subject: Re: IPv6 with venet : is it possible ?
Posted by swindmill on Thu, 17 Jul 2008 17:26:40 GMT

On my CentOS 5.2 host nodes I do not see that ipv6 forwarding is enabled by default.

According to this page:

http://pages.citebite.com/y6x6c2h3misp

Linux does not allow you to turn on ipv6 forwarding for a single interface. It must be enabled or disabled globally.

Can you check `cat /proc/sys/net/ipv6/conf/all/forwarding` on your host node and report back?
