Subject: Nat inside VE - openvpn again
Posted by mperkel on Mon, 21 Jul 2008 08:37:09 GMT

Getting this inside the VE:

iptables -L -t nat
iptables v1.4.1.1: can't initialize iptables table `nat': Table does not exist (do you need to insmod?)
Perhaps iptables or your kernel needs to be upgraded.

On the HN it works:

iptables -L -t nat
Chain PREROUTING (policy ACCEPT)
target   prot opt source   destination

Chain POSTROUTING (policy ACCEPT)
target   prot opt source   destination

Chain OUTPUT (policy ACCEPT)
target   prot opt source   destination

Conf file has:

IPTABLES="ipt_REJECT ipt_tos ipt_TOS ipt_LOG ip_conntrack ipt_limit ipt_multiport iptable_filter

iptable_mangle ipt_TCPMSS ipt_tcpmss ipt_ttl ipt_length ipt_state iptable_nat ip_nat_ftp"

It's 1:30 in the morning and I'm brain dead. What am I doing wrong.

Thanks in advance.
