gozargah,

Why are you asking about a quota error in the middle of this topic (which is completely unrelated)?

I'm not going to even attempt to provide an answer here. If you do a few searches on the forum you'll probably find reference to the problem and how to fix it. I have encountered that once or twice in the last 3 years but I don't recall the specifics. After doing a few searches if you are still unable to find a fix for your issue, create a new forum topic.
