1- Yes, it me. im use "vzctl start 380" after reboot server for start this vps and see:
[root@ ~]# vzctl start 380
Starting VE ...
vzquota : (warning) Incorrect quota shutdown for id 380, recalculating disk usage

But its taking unusally long time for recalculating disk usage and ctrl+c is not work for cancle this
command too.

2- A) cat: do_wait
B) strace: Process 23408 attached - interrupt to quit wait4(23423,
0x7fff9da80e84, 0, NULL)   = ? ERESTARTSYS (To be restarted)
--- SIGINT (Interrupt) @ 0 (0) ---
wait4(23423, 0x7fff9da80e84, 0, NULL)   = ? ERESTARTSYS (To be restarted)
--- SIGINT (Interrupt) @ 0 (0) ---
wait4(23423, 0x7fff9da80e84, 0, NULL)   = ? ERESTARTSYS (To be restarted)
--- SIGINT (Interrupt) @ 0 (0) ---
wait4(23423,
