Unfortunately I don't try that but hope it works.

That was the trick. I did have to install a half dozen other packages to satisfy dependencies, but eventually that worked.

To document what I did in hopes it will help others, here's the script I used to successfully install yum:

rpm -Uvh http://mirror.centos.org/centos-4/4/os/i386/CentOS/RPMS/gmp-4.1.4-3.i386.rpm
