Hi,

I'd like to know if there might be any issues with running quagga routing daemon inside VE with recent stable openvz kernel? Specifically if netlink interface will work ok then using veth devices?

<http://quagga.net/docs/docs-multi/Linux-notes.html#Linux-not-es>

<http://quagga.net/docs/docs-multi/Kernel-Interface.html#Kernel-Interface>

Thanks

Alex
