Quote:[root@Char ~]# uname -a
Linux Char.ICS.local 2.6.18-53.1.19.el5.028stab053.14 #1 SMP Thu May 8 16:29:13 MSD 2008 x86_64 x86_64 x86_64 GNU/Linux
[root@Char ~]# vzctl
vzctl version 3.0.22

The user of an fc7 VPS was complaining about the password getting reset... so I used the vzctl command to reset the password, which it reported was successful. However, I cannot login with the password I just set. I tried making a new user, but that doesn't set either.
