Subject: The VPS iptables rule limit
Posted by gozargah on Thu, 07 Aug 2008 14:45:42 GMT

Hello,

We installed csf firewall in main node and we have following error when try to start firewall, how can resolve this issue?

[root@m5088 csf]# csf -s
Error: The VPS iptables rule limit (numiptent) is too low (400/400) - stopping firewall to prevent iptables blocking all connections, at line 123

Thanks
