I trying to mount an NFS filesystem in a container.

```
mount -t nfs -o rw,hard,intr,proto=tcp,rsize=32768,wsiz=32768,nfsvers=3
```

But the actual mount reads:

```
> mount
```

```
type nfs rw,vers=3,rsize=8192,wsiz=8192,hard,intr,proto=tcp,timeo=60
0,retrans=2,sec=sys,addr=
```

What am I missing?
