Subject: Kernel Version Problem
Posted by mperkel on Fri, 15 Aug 2008 17:02:37 GMT

Trying to upgrade a VE from Fedora 8 to Fedoa 9 and I'm getting this:

initscripts conflicts with kernel < 2.6.12

I'm running 2.4.24 kernel. So I don't understand why it thinks the kernel is older.

Thanks in advance.
