Subject: Re: Problem creating directory or file with foreign characters on VE based on Centos 5 default templ
Posted by fgomes on Mon, 18 Aug 2008 09:58:59 GMT

Yes, you are correct! That's seems strange because I was using putty configured to use UTF-8 on windows XP, connected to both hardware node and VE, and it works well on the HN and not on the VE... But after your email I used a Ubuntu 8.04 to connect to the VE and it worked well. Thanks for your help!
