Hi,

Quote:

but this command fails:

```
cat > /etc/udev/makedev.d/51-udev.nodes
```

What does it mean "fails"?

The article suggests you to create /etc/udev/makedev.d/51-udev.nodes file and put down there the devices you want to be created automatically.

You can create that file manually and put there appropriate devices (tty, pty etc)
