Subject: 2.6.18-92.1.1.el5.028 kernel does not compile zaptel Posted by easyvoxbox on Wed, 20 Aug 2008 02:11:47 GMT View Forum Message <> Reply to Message

The latest kernel that is the default for yum install, (2.6.18-92.1.1.el5.028s) will not compile the Asterisk Zaptel interface. I had to drop back to the 2.6.18-53.1.19.el5.028 kernel.

Has anyone else experienced this? This appears to be a problem with the kernel.
