I'll look into that as it runs. Seeing a few of these:

```
httpd    9712  apache 710w    REG          0,20      0 13369352 (deleted)
/var/log/httpd/ssl_mutex
httpd    9713  apache 710w    REG          0,20      0 13369352 (deleted)
/var/log/httpd/ssl_mutex
```

Logrotate runs once a week. But HTTPD is restarted lately fairly often. But the server was locked up this morning with the same disk space complaint.

Here's what the logs were showing today.

```
[Tue Sep 02 05:08:02 2008] [crit] (28)No space left on device: mod_rewrite: could not create
rewrite_log_lock
Configuration Failed
```
