I have a VE where the simfs doesn't show up. And it's the VE that I'm also having disk space problems where it thinks it's out of space where it isn't.

Other VEs on the same computer show simfs correctly.

On one that works:

== df ==

Filesystem	1K-blocks	Used	Available	Use%	Mounted on
simfs	697356528	338233496	323699312	52%	/
/dev/sdc3	716332324	566070620	113874080	84%	/nobackup

== mtab ==

simfs /	simfs	rw	0	0
/dev/sdc3	/nobackup	ext3	rw,noatime,user_xattr,acl,data=ordered	0 0
/proc	/proc	proc	rw	0 0
/sys	/sys	sysfs	rw	0 0
none	/dev/pts	devpts	rw	0 0

== fstab ==

none	/dev/pts	devpts	rw	0 0
------	----------	--------	----	-----

=====

On the one not working:

== df ==

Filesystem	1K-blocks	Used	Available	Use%	Mounted on
tmpfs	1228800	0	1228800	0%	/tmp
tmpfs	1228800	0	1228800	0%	/var/lib/php/session

== mtab ==

none	/dev/pts	devpts	rw	0 0
tmpfs	/tmp	tmpfs	rw,noexec,nosuid,nodev,size=1200m	0 0
tmpfs	/var/lib/php/session	tmpfs	rw,noexec,nosuid,nodev,size=1200m	0 0

== fstab ==

none	/dev/pts	devpts	rw	0 0
------	----------	--------	----	-----

```
tmpfs /tmp      tmpfs size=1200m,noexec,nodev,nosuid 0 0
tmpfs /var/lib/php/session  tmpfs size=1200m,noexec,nodev,nosuid 0 0
```

What am I missing? Thanks in advance.
