## Subject: Re: why buffers cached is always 0 in VPS/VE?
Posted by khorenko on Tue, 09 Sep 2008 06:29:35 GMT

Hi,

Quote:you see, if "buffers" and "cached" is unavailable, it actually needs more memory for running applications, right?

This should not influence at all in fact.

Please, check /proc/user_beancounters - is there any failcounters after an attempt to start tomcat/mysql?
