Subject: Kernal Problem !
Posted by Java on Sat, 20 Sep 2008 11:04:33 GMT

Hi palls,

I've a problem with kernel
after updating kernel , Server memory has become much less
and after 12 Gb the server memory become only 3 Gb

now it's
----
 free -m

```
         total     used     free    shared   buffers    cached
Mem:      3286     3107      178        0       194       1752
-/+ buffers/cache:    1161     2124
Swap:    12291        5    12286
```

----

and i need you to help me to solve that problem fast because some vpss are down now because
of memory .
