Hello,

Quote:

error: cannot create %sourcedir /usr/src/redhat/SOURCES

- you should install rpm-build package.
 - after that install src rpm.
 - then go to /usr/src/redhat/SPECS/ directory and build kernel sources. "rpmbuild -bp --target=i686 kernel-ovz.spec"
 - after that you can find kernel sources in /usr/src/redhat/BUILD/ directory
 - may be you have to move (create symlink) to (from) /usr/src directory also.
 - then try to build zaptel again
-
