## Subject: Fail to ping hostname
Posted by satimis on Wed, 24 Sep 2008 15:26:51 GMT

Hi folks,

OpenVZ
Ubuntu 8.04 Hardy - Host
Ubuntu 8.04 Hardy - Guests

Both host and guests are working.  They can ping and ssh-connect each other on IP.  But they can't ping nor ssh connect each and others on hostname.  I have been playing around on hosts, hostname, resolv.conf, etc. for the whole day without a solution.  Please help.  TIA

B.R.
