Hello,

check this links will help you to understand

( [http://wiki.openvz.org/UBC\\_systemwide\\_configuration#Memory\\_and\\_swap\\_space](http://wiki.openvz.org/UBC_systemwide_configuration#Memory_and_swap_space) )

and

( [http://wiki.openvz.org/Setting\\_UBC\\_parameters](http://wiki.openvz.org/Setting_UBC_parameters) )

and to hide your UBC

vzctl set CTID --meminfo none --save --setmod restart

regards

Alaa Eldin
