Subject: ACCT Support Posted by pdaures on Fri, 03 Oct 2008 16:19:52 GMT View Forum Message <> Reply to Message

Hello,

I'm using linux 2.6.18 and I would like to use the command "accton" in a virtualized computer. In the host computer, it works fine.

But in the virtualized machine, I have a message like "operation not permitted".

Is ACCT supported in openvz ?

Thank you
