Now this is what I am getting when I run vzyum 1001 update

```
vzyum 1001 upgrade
```

```
exec /usr/share/vzyum/bin/yum -c /vz/template/centos/5/i386/config/yum.conf --installroot  
/vz/root/1001 --vps=1001 upgrade
```

Setting up Upgrade Process

Setting up repositories

```
centos5-vz-addons      100% |=====| 951 B  00:00
```

```
centos5-updates-released 100% |=====| 951 B  00:00
```

```
centos5-base           100% |=====| 1.1 kB  00:00
```

Reading repository metadata in from local files

```
primary.xml.gz         100% |=====| 226 kB  00:00
```

```
http://mirror.centos.org/centos/5/updates/i386/repodata/primary.xml.gz: [Errno -1] Metadata file  
does not match checksum
```

Trying other mirror.

```
Error: failure: repodata/primary.xml.gz from centos5-updates-released: [Errno 256] No more  
mirrors to try.
```

Can someone help me, I need to get Centos 5 up and running.

Thanks,
tingerr
