I am working on a customers VPS, and he has cPanel installed on it. He is getting this error.

"Fatal error: Maximum execution time of 30 seconds exceeded in  
/home/worth/public\_html/it/includes/class\_db.php on line 162"

I edited php.ini to reflect the following:

max\_execution\_time = 100

max\_input\_time = 100

memory\_limit = 32M

That didn't change anything. Any idea on what's wrong?

The error still says

"Fatal error: Maximum execution time of 30 seconds exceeded in  
/home/worth/public\_html/it/includes/class\_db.php on line 162"
