Subject: Re: Using private ip for containers with public ip for the hardware node Posted by khorenko on Mon, 10 Nov 2008 08:09:20 GMT View Forum Message <> Reply to Message

Hi,

well, you can configure iptables on a Hardware Node in such a way that packets received on the Hardware Node on port X will be forwarded to some Container to port Y if this is what you need.

Then to reach Container you'll need access Hardware Node's IP and use port X.
