Hi,

Here is a screendump of the current mem usage:

Cpu(s): 0.0% us, 0.0% sy, 0.0% ni, 100.0% id, 0.0% wa, 0.0% hi, 0.0% si

Mem: 3100624k total, 3079184k used, 21440k free, 39664k buffers

Swap: 1959912k total, 0k used, 1959912k free, 2863528k cached

After the oops the complete machine hanged and I saw the earlier posted message on the serial console, the only action I could take was cutting the power of the machine and starting it up again.

Regards,  
Kim
