Subject: Re: OpenVZ & PostgreSQL: shmpages, shared_buffers, kernel.shmmax
Posted by khorenko on Thu, 13 Nov 2008 15:25:10 GMT

No, wiki page is ok, it says:

Quote: * The sysctl kernel.shmmax value set in the HN/CT0 applies only to the HN, not to containers.
and this is true. Setting kernel.shmmax sysctl won't affect containers in any way and thus no need to touch it if we run PG inside a Container.
